Additional help for your child

Dear Parents,

a good school education is very important. The school wants your child to learn well. We at the KinderHelden organization are also helping - together with the school.

How does this work?

Your child will receive a volunteer mentor for one year. The mentor helps your child with reading, arithmetic and learning German.

There is also playing, crafting and sometimes there are excursions.

A father says: "My daughter Sara has learned a lot and is making good progress."

How can my child take part?

The teacher registers your child. Your child can join in if they

Needs help at school and wants a mentor. You have to agree.

How does it work?

After registering, we get to know your child. Then we look for a suitable mentor. You can be there at the first meeting and get to know the mentor. After that, the mentor and your child meet every week for 2-3 hours.

Who are the mentors?

Mentors include older schoolchildren, students, employees and pensioners. They are people who share their knowledge. They are good role models for your child. They help in their free time and don't get any money for it.

How much does the project cost?

Participation is free!

Do you have questions?

Please feel free to contact KinderHelden. The teacher can also help you register or answer questions.

Register your child now - there are still places available!
